Experience

United Overseas Bank Ltd.

September 2024 - Current

Global Market Operations Officer | New York, NY | June 2025 - Current

- Communicated with counterparties to ensure timely settlements of FX, MM, and securities trades to minimize settlement risk.
- Utilized Murex 3 to validate and reconcile trade settlements ensuring accurate accounting of cash flows and funding.
- Forecasted intraday and end-of-day cash positions, to optimize liquidity usage and support treasury funding and investment decisions while minimizing overdraft and settlement risk such as with daily HQLA and LCR reports.
- Tracked and reported daily FX Net Open Position exposures while escalating breaches to reduce currency risk.
- Measured liquidity concentration risk across counterparties, currencies, and funding sources to ensure diversification and regulatory compliance.
- Executed Federal Reserve Bank and Nostro account transfers to ensure accurate and timely settlement to support operational funding.
- Reconciled user entitlements in BNY Nexen treasury platform, mitigating audit observations and strengthening access control compliance.

Branch Operations Officer | New York, NY | September 2024 - June 2025

- Streamlined the maker-checker process within Operations by developing a VBA-based Excel application with automated workflows and processing logic, reducing operational risk from excessive email communication.
- Managed incoming and outgoing SWIFT payment messages in Alliance Messaging Hub (AMH), including payment instructions and message processing while ensuring AML, OFAC, and regulatory compliance.
- Coordinated with third-party vendors to complete services such as archival destruction, ensuring record retention guidelines and to complete due diligence and vendor management of third-party and outsourcing providers to mitigate operational, reputational, and financial risks.
- Executed daily cash management operations, including client deposits, withdrawals, fund transfers, and settlements, ensuring processing within established cut-off times.
- Managed operational risk by monitoring monthly Key Operational Risk Indicators (KORIs) and conducting annual Key Risk and Control Self Assessments (KRCSAs) to ensure compliance with internal policies as well as MAS and US regulatory standards.
- Maintained and tested disaster recovery procedures by conducting business impact analyses, recovery drills, business continuity risk assessments, and documenting business continuity strategies.
- Assisted with implementation of projects such as the Fedline Advantage and Fedline Direct improving settlement efficiency, minimizing operational, reputational, and financial risk.
- Assisted IT in ensuring compliance with DFS Part 500 cybersecurity requirements, Fedline Advantage and Fedline Direct infrastructure setup, data leakage protection (DLP) monitoring, business continuity planning, user access maintenance, and day-to-day troubleshooting.
- Supported oversight of IT and operational assets during the merger integration of UOB's New York and Los Angeles branches.
